Advanced TM Project: Part II

Having developed your project plan in Part I, in Part II you will implement your proof of concept and the deliverables you defined in your previous submission.

- You'll receive individual feedback for your project plan, and based on this hand in by email to colic@ifi.uzh.ch a revised project plan by Friday, 20.3 at 1015 AM called `color_1_revised.pdf` (according to your team color).
  - Also, in the same document add an additional section containing a link to a github repository to which you will upload your code. Note that by then there does not necessarily have to be any code on the repository. However, in case you are not familiar with git yet, it might make sense to familiarise yourself with it.
  - Furthermore, add a section containing a coarse project plan. Specifically, for each deliverable you indicated in Part I, break it down into 4 hour work packages, and in a table, for each of these work packages, indicate who will do it and by when. This should amount to about 20 hours per person. Leave an additional column free to indicate how much time was effectively used for the completion of the work package.
- On Friday, 27.3, and on Friday, 3.4, at 1015 AM send an updated version of the same document, with this last column filled out in accord to the work you've actually done.
- Remember that on Friday, 3.4, at 1015 AM we also have our next tutoring session in which we will already discuss the paper writing. However, you have until the 10.4 to finish Part II. This overlap is due to the various holidays that fall on Fridays in this term.
- By Friday, 10.4, at 1015 AM you should be finished with Part II and be able to submit your deliverables. Upload them to your github in a directory called `/deliverables` and inform the tutor by email.

→ explain git for those that don't know it

Updated Dates

date	tutoring session	deadline
Friday 13.3	kick off part II	
Friday, 20.3		part II: revised project plan
Friday, 27.3		part II: progress update
Friday 3.4	kick off part III	part II: progress update
Friday 10.4		part II: proof of concept
Friday 24.4	kick off part IV	
Friday 1.5		part III: paper
Friday 8.5		part IV: poster
